

EXPLORE:

Features of eLynxx Software

eLynxx software works to control costs through the automation of the smallest details right down to bulletproof change order management. The robust list of features incorporated into eLynxx software drives four areas crucial to print procurement success and strengthens every link, from end to end, in the marketing supply chain.

Coordinate

- Simplifies the gathering of project files and details from internal and external resources
- Automatically routes approvals and capture decisions
- Provides functionality and access based user role and need
- Makes creation of precision specifications fast and easy

- Puts previous specs at your fingertips for reuse or modification
- Connects with assets in internal and cloud-based digital libraries
- Allows you to estimate pricing without vendor commitment
- Helps you create accurate budgets based on known specifications

Source

- Create a vendor pool that fits your organization's needs
- Automatically match vendor capabilities to projects to find the best quality, timeliness and price
- Contract directly with vendors
- Send RFPs, specs and related documentation to your vendors

- Compile and distribute prices and information to decision makers
- Distribute terms, NDAs, MSAs, brand guides and other documents
- Fulfill diversity, environmental and certification initiatives
- Maintain information on vendor performance, pricing and more

Manage

- Provides a dashboard view of project and task status
- Sends automatic notification of tasks, deadlines and decisions
- Automates distribution of files and digital assets
- Tracks the performance of vendors and users on each project
- Streamlines vendor management

- Highlights activity that could result in costly change orders
- Records correspondence and actions for future reference
- Allows correspondence and actions to be annotated for clarity

Analyze

- Captures every detail of every transaction in every project
- Provides secure yet hassle-free access to details of past projects
- Tracks project costs in real time
- Provides proof of actions taken toward diversity, environmental and business status initiatives

- Gives you the power to create custom reports based on any project, vendor, user or business information that has been captured
- Produces a final audit of each project providing a detailed, easy to understand compilation of details in a single document
